**DETAILED ACTION**

**EXAMINER'S AMENDMENT**

The application has been amended as follows:

The abstract on page 18:

A system and method are disclosed for using standard issue synchronous optical network (SONET) framers to comply with current automatic protection system (APS) standards. Each standard framer includes its own section, line, and path layer termination. The working set of lines and protection set of lines of the APS system are switched after the path layer rather than before. A firmware solution allows for a proper use of various error indication signals.

### **REASONS FOR ALLOWANCE**

Claims 1-36 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art fails to teach separating the path layer and having separate framers for the working set and protection set of SONET lines.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Sha (US 6,868,057) discloses an ATM network with separate framers for each line interface unit, however does not disclose the physical network being SONET.
